Dimension

22 mm x 129 mm (thickness x width)

Grades *See images on the back side*

CLASSIC

This grade has a uniform look with some colour and structural graining variation between the individual staves. Few small knots and natural fine splits occur.

VARIATION

This grade has a rustic look with substantial colour and structural graining variation between the individual staves. Several small and large knots and natural fine splits occur. Knots and other irregularities are to the greatest extent possible factory filled with a one colour filler.

About the floor

Maple is a hardwood species characterised by being hard-wearing and therefore very suitable for flooring. The uniform grain structure and the natural light colour add an elegant appearance to the floor. When maple is slightly white toned by using the colour Nordic the Scandinavian touch is emphasized even more.

Junckers solid hardwood flooring is produced and categorized in accordance with EN 13629, EN 14342 and Junckers own factory standard. The floors are made exclusively from solid hardwood and the images illustrate the colour, knots and structural graining variation characteristic for the specific wood species and grade.

Each image shows the average appearance of the grade. It is normal to see a variation in appearance between individual boards, staves and floors produced and installed at differing times.

Up to 5% of the staves may contain features of the next style.

Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.

MAPLE NORDIC 2-STRIP | GRADES

The actual colour on a wooden floor can vary from the colour shown in this style chart. This is due to the fact that colours are very difficult to reproduce online and in printed material. Junckers accepts no liability to discrepancies and we always recommend ordering a physical sample before placing an order.
